## EXPERIENCE

### Blue Origin | Undergraduate Intern

JANUARY - APRIL 2026 (Kent, WA)

- **Club for the Future:**
  - Led end-to-end execution of automated data workflows and a custom AI agent within a 4-person team, **saving 15+ hours each week** in manual tracking.
  - Created strategic distribution channels to **reach 3,500 employees**, while managing event logistics and educational resources for **75+ educators** that successfully **impacted 2,000+ students**.
- **Cybersecurity - GRC:**
  - Owned the product lifecycle for secure internal GRC web tools designed to serve all **12,000+** employees internally once deployed; translated complex compliance workflows into modular, user-centered web applications using **HTML, CSS, and JavaScript**, alongside **Python** data pipelines.
  - Standardized internal technical documentation and cross-functional knowledge-sharing processes using **Git**, accelerating team onboarding and aligning engineering squads.

### iD Tech | Undergraduate Intern

MAY - AUGUST 2026 (Seattle, WA)

- Managed multi-disciplinary STEM curriculum delivery (Roblox/Lua, Mobile App Dev, Battlebots) and daily campus operations for **100+ students weekly** across high-visibility locations (Bellevue College, UW, Amazon HQ), translating complex programming concepts into structured, accessible learning modules.

### Code Ninjas Sammamish | Sensei (Lead Instructor)

MAY - AUGUST 2025 (Sammamish, WA)

- Mentored and guided **400+ students** through core Python, Lua, and Java fundamentals; partnered with management to design real-world application projects that directly improved student retention and engagement.

### Code Ninjas Sammamish | Social Media Manager

MARCH 2025 - JANUARY 2026 (Virtual)

- Drove digital acquisition and outreach strategy across Mailchimp, Instagram, and Facebook, scaling K-12 program visibility by **150%**; planned community workshops and enrollment campaigns to accelerate local growth.

### True Martial Arts Sammamish | Senior Instructor

2019 - 2025 (Sammamish, WA)

- Directed administrative operations, quality control, and student progression frameworks for **750+ members** of all ages; managed weekly data entry, performance tracking, and cross-functional mentorship programs.

## EDUCATION & CAMPUS LEADERSHIP

### Rensselaer Polytechnic Institute (RPI) | Troy, NY

- **Bachelor of Science in Computer Science & Economics** | Minors: Behavioral Data Science & Quantum Computing (Expected May 2028)
- **Relevant Coursework:** CS1 (**Python**), Data Structures (**C++**), Computer Architecture & Operating Systems (**C & MIPS Assembly**), Foundations of Computer Science (**Discrete Math**), Matrix Algebra, Principles of Software (**Java**), Embedded Control (**C & circuit hardware**), Econometrics (**Stata**).
- **Leadership & Governance:**
  - **Girls Who Code College Loop (Treasurer (2025) & Corporate Relations Lead (2026)):** Managed financial logistics, corporate partnership outreach, and event planning to foster women in tech initiatives.
  - **Computer Science 1 (Undergraduate Mentor):** Facilitated technical lab sessions, mentored introductory cohorts, and guided students through debugging and foundational Python concepts.
  - **The Polytechnic (Associate Business Manager):** Drove the return of ad revenue to the student newspaper, to expand the budget and increase printing frequency; managed general finances of the club.

## CERTIFICATIONS & SPECIAL TRAINING

- **Product Strategy for Product Managers Nanodegree** (Girls Who Code x Udacity): Applied product analytics, A/B testing, and KPI frameworks to real-world scenarios.
- **Road to Quantum Practitioner Program (Intermediate) & Qiskit Global Summer School** (IBM): Configured advanced quantum circuits, optimization loops, and transpilation passes using Qiskit Primitives and Runtime.

## TECHNICAL PROJECTS

- **TRRAM (The Retro Registration Autonomous Manifesto):** Architected and deployed a full-stack, user-tested course registration web application for RPI students using **HTML/CSS/JS/SQL** and full-stack web dev frameworks; scoped core features and managed end-to-end execution to optimize campus planning.
- **Rapid Prototyping & Maker Ventures:** Built user-focused physical and software tools (Arduino-based environmental eco-monitor, **C++** LED Pomodoro productivity indicators) to solve localized friction and tracking pain points for peers.
